Industrial **ARMOR** CURTAIN

Heavy-Duty Retractable Barrier

The Industrial Armor Curtain system is designed to close in large doors and openings on open commodity buildings, storage sheds and pavilions.

The fabric used is permeable allowing some air movement while maintaining a minimum level of ventilation. Due to the style of the fabric with small openings, rain and snow will not be allowed to penetrate and enter the building providing a protective barrier for the building's contents.

ARMOR CURTAIN APPLICATIONS:

- **INDUSTRIAL OVERHANGS**
- **RETAIL GARDEN SPACES**
- **PATIOS AND PAVILIONS**
- **FRESH AIR MARKETS**
- **COMMODITY STORAGE BUILDINGS**
- **RECREATIONAL BUILDINGS**
- **OTHER OPEN AIR BUILDINGS**
